

PM 2.5 SMOKE

AN INFORMATION SESSION ABOUT AIR QUALITY

Nearly everything concerning air quality and air pollution in communities comes down to a few simple questions:

- What is it?
- Where does it come from?
- Why do we care?
- How bad is it?
- Is it getting better or worse?
- What can we do about it?

This workshop, led by Ralph Adams (Ministry of Environment Air Quality Meteorologist) will answer each of these questions using examples local to Williams Lake. It will not be overly technical: anyone who is interested in air quality can participate. The morning session will be broken into sections with breaks, and there will be ample time for questions and discussion. Ralph will be available after to answer any additional questions and discuss the Ministry of Environment monitoring programme and results.

Thursday, September 27, 2018, 9am to 12pm

Scout Island Nature Centre

Space is limited; please RSVP to
